

Metro Mantel™ for the 564 E Electric Fireplace

Architectural Double Doors
with Artisan™ Nickel Onlays

Introducing the new Metro Mantel™ cabinet for the 564 E Electric Fireplace. As an alternative to wood cabinet mantels, the new Metro Mantel is constructed of brushed nickel sheet metal with a textured black powder-coated hearth base. As you can see the Metro Mantel is a striking contemporary accessory. All Architectural Double Door faces as well as the rectangular Metropolitan™ beveled faces will fit this fireplace and mantel pairing.

Metropolitan™ Nickel Face

Overall, the Metro Mantel measures 36-3/4" tall and is 50-1/8" wide by 18-3/8" deep at the base. The fireplace easily slides into the mantel and is firmly held to the base with a bracket across the back.

The 564 E Electric Fireplace features a Purifire™ air filter to continuously clean the air in the room even when the fireplace heater and flame display is not operating. Access to this filter is greatly simplified with the Metro Mantel. The mantel top lifts right off for easy service!

Make your home into something truly extraordinary with the Metro Mantel - only from Fireplace Xtrordinair™.
