Featuring Built-in Sound System

Hideaway E™ Portrait-Style Electric Fireplace

The first fireplace that brings sweet music to your ears!

Introducing the Hideaway E Electric Fireplace. This versatile, electric fireplace is perfect for homeowner's who are looking for an easy to install appliance that offers a beautiful, realistic fire display, a supplemental heat source, push button convenience and great music! Wait a minute - Great music? From a fireplace?

That's right! The Hideaway E features a built-in 25 watt amplifier, two quality 4" speakers and connections to plug in your iPod™, iPhone™, Mp3 player or wireless streaming audio device. We even include an Apple™ compatible docking cord to keep your device charged and ready to play.

It's really that easy!

Operating from any 110 volt wall outlet, the Hideaway E is conveniently plug-and-play. You have the option of running the fireplace with only the fire on or with the fire and heater. Use the remote control for all these functions along with the thermostat, sleep timer, fan, accent light and music features. The Hideaway E is ideal for apartment renters, condo owners, basements, offices, bedrooms, and today's busy lifestyle. No expensive chimney or gas access is needed for the Hideaway E to burn brightly.

It's all in the fire!

The radiating, pulsating fire of the Hideaway E can be viewed through 394 square inches of glass. A custom, high quality log set glows as the fire appears to burn and the ember bed flickers. Low voltage LED lights are built into the logs and the flame, and the speed of the flame can be modulated with the remote control.

Add warmth to your room!

A built in heater and circulating fan is yet another great feature of this fireplace. Producing 5,000 Btu's and heating up to 400 square feet, the fireplace serves perfectly as a supplemental heat source to the room the fireplace is in. Operating costs when used with the built-in thermostat averages about 8 cents an hour*.

**This may vary with your local utilities costs.*

With The Remote You Control:

1. Thermostat Control
2. Top Accent Light
3. Flame Speed
4. Sleep Timer
5. Audio Volume
6. Power ON/OFF
7. Music ON/OFF

Add A Fireplace Anywhere:

With a pre-built cabinet you can add the Hideaway E virtually anywhere in your home. Shown above with the Bungalow face and J. C. Huffman Seville mantel.

We include a connection cable that is compatible with most common audio devices for plug and play convenience, and we include a retractable charging cable that has the proprietary connection for Apple™ devices such as the iPod™ or iPhone™. You can also choose to connect a wireless audio receiver (not included) if you want to use streaming audio from a computer.

Personalize Your Look!

Face Design Options

You can personalize the finished look of your Hideaway E fireplace with one of four different custom designer faces in a variety of colors and finishes.

**Universal
Face**

The economical, basic black painted frame is designed for a clean simple look.

21 1/4" W x 35 3/8" H

Finishing Your Installation

You have two ways to finish the installation of your Hideaway Electric fireplace within your home. You can use one of the pre-built cabinet systems available through your Avalon dealer. Or you can build it into an existing wall or chase and sheetrock up to the face and simply paint or add facing like a traditional fireplace with stone or tile.

Pre-Built Fireplace Cabinets

If you are looking for exceptional value, add a pre-built fireplace mantel systems and you can have your new Hideaway Electric fireplace installed in less than one hour! A 15 AMP, 110 VOLT wall outlet is required. These fireplace mantels allow the fireplace to be installed against any wall in your home. Pre-built fireplace mantels also make it easy to relocate your fireplace at any time.

Mantels are available from:

J. C. Huffman Cabinet Co.

www.jchuffman.com

and

Grand Mantels

www.grandmantel.com

Built-In Installation

If you want a flush-to-the wall look for your fireplace, you have the option of building in or framing around your Hideaway E Fireplace.

When framing the Hideaway E enclosure you must use the following MINIMUM internal opening dimensions shown to the right.

The fireplace can be hard-wired to a 15 AMP 110 volt circuit. Consult your local electrical codes.
